9. South Dakota Agriculture Bulletin: 2015

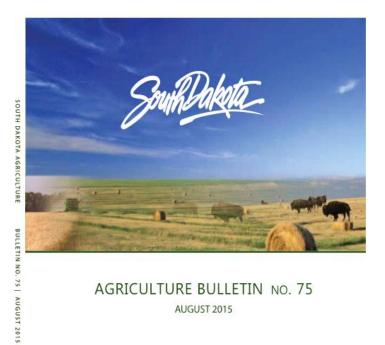

Friday, January 08, 2016 2:34 PM

AGRICULTURE BULLETIN NO. 75 AUGUST 2015

PREFACE

Funding for this publication was provided by the South Dakota Department of Agriculture.

County crop data for 2013-2014 are contained in this bulletin. State crop, livestock, price, and income data are also included.

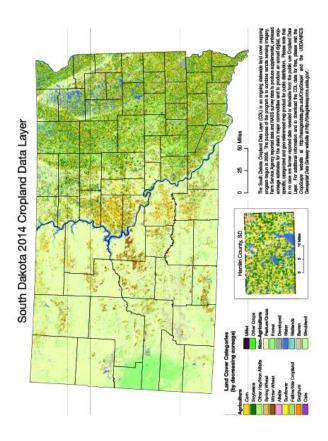

For county crop data prior to 2012 and other historic data, please go to the national online searchable database at www.nass.usda.gov and customize a search under Quick Stats.

All current data in this bulletin are preliminary and subject to revision the following year and after review of the United States Census of Agriculture data every five years,

Acknowledgment is given to the many South Dakota farmers, ranchers, and menchants as well as numerous commercial, educational, and government agencies who have voluntarily contributed basic information used in compilation of these data.

Photographs by South Dakota Tourism.

- · Building Maintenance
- · Marketing & Events Coordination
- · Camping & Competitive Exhibits Coordination
- · State Fair Foundation Coordination
- · State Fair Advisory Commission Coordination

DIVISION OF WILDLAND FIRE

Director: Jay Esperance (605) 393-8011

Division Responsibilities Include:

 Protecting state and private lands within the Black Hills Forest Fire Protection
 District and other forested areas throughout the state.

STATE OF SOUTH DAKOTA

Dennis Daugaard GOVERNOR

My Fellow South Dakotans,

This year's South Dakota Agriculture bulletin gives me an opportunity to reflect on all that agriculture gives to us as a state. For over a century, South Dakota has been home to innovative agriculture; growing to be our largest industry today.

As detailed in this bulletin, agriculture in South Dakota is strong. In the past 25 years, we have seen increases in the number of acres planted with major commodities like corn, soybeans, and sunflowers. We remain the number one state in the nation for both sunflower and oat production.

We have also maintained strong livestock numbers. South Dakota ranks in the top ten in the nation for production of bison, sheep and lambs, beef cows, and pigs. We have also increased our cheese production by more than 30 million pounds since 2009. South Dakota also jumped to number two in the nation for honey production, increasing production to almost 25 million pounds last year.

These numbers provide us important information about the health and potential for growth in our industry, as well as some historical perspective on the changes that have taken place. I am thankful for our state's producers and businesses who continue to provide safe, wholesome, and affordable food for the people who live in the United States and around the globe. The information in this year's bulletin shows a strong history of success for agriculture in our state, and I believe the industry will continue to thrive in our state in the years to come.

Sincerely,

Dennis Daugaard

Denni Daugearel

STATE OF SOUTH DAKOTA

Lucas Lentsch SECRETARY OF AGRICULTURE

Dear Friends and Neighbors,

The 2015 South Dakota Agriculture bulletin brings together information from across our state to give us a picture of the state of our industry. Agriculture remains the largest industry in South Dakota. As we learned from the 2014 South Dakota Agricultural Economic Contribution Study published in last year's bulletin, agriculture has an economic impact of \$25.6 billion annually in our state and employs more than 115,000 South Dakotans.

This year, the South Dakota Department of Agriculture partnered with the National Agricultural Statistics Service (NASS), part of the U.S. Department of Agriculture (USDA), to collect and distribute important information on agricultural activity. This year's South Dakota Agriculture includes data collected by the South Dakota NASS office showing numbers on production and yields of crops, livestock and poultry inventory, and agricultural income and prices at the county, state and national levels.

This year's bulletin also once again provides data on South Dakota agriculture from USDA's 2012 U.S. Census of Agriculture. It also includes a reprint of the *2014 South Dakota Agricultural Economic Contribution Study* conducted last year based on data from the 2012 Census.

All of this data gives us a more complete picture of all the aspects of our industry. I hope you find the information contained in the 2015 *South Dakota Agriculture* bulletin informative and useful.

Sincerely,

Lucas Lentsch

523 EAST CAPITOL AVENUE | PIERRE, SOUTH DAKOTA 57501-5070 | (605) 773-5425

UNITED STATES DEPARTMENT OF AGRICULTURE

National Agricultural Statistics Service – South Dakota Field Office

Erik Gerlach

It is a pleasure to present the 2015 South Dakota Agricultural Statistical Bulletin.

The statistics presented in this bulletin are a compilation of the hundreds of reports issued by the National Agricultural Statistics Service (NASS) each year. Producers, farm organizations, agribusiness and government agencies rely heavily on the information produced by NASS to make informed business decisions and administer farm programs based on facts provided directly from farmers and ranchers themselves.

First and foremost, thank you to South Dakota's producers and their dedication to agriculture. This vital information would not be possible without the cooperation of thousands of South Dakota farmers and ranchers who recognize the value of good information and respond to questionnaires and personal interviews. Thanks also go out to elevator managers, other agricultural businesses, extension educators, and Farm Service Agency county directors, who provide additional information used in preparing these statistics.

Thank you to our National Association of State Departments of Agriculture field and phone enumerators for their dedication in providing our state with the highest quality agricultural statistics. It would also be hard to overestimate the importance of the leadership and cooperation of the South Dakota Department of Agriculture in producing this publication.

It is our goal to continually provide accurate, timely and useful statistics in service to agriculture. Please contact me anytime with your questions, comments, or requests for information.

Sincerely,

Erik Gerlach

Enil Tuled

USDA is an equal opportunity provider and employer.

SDSU COLLEGE OF AGRICULTURE & BIOLOGICAL SCIENCES SDSU EXTENSION

Barry H. Dunn, Ph.D.
SOUTH DAKOTA CORN UTILIZATION COUNCIL ENDOWED DEAN
DIRECTOR OF SDSU EXTENSION
PROFESSOR OF ANIMAL SCIENCE

My fellow South Dakotans, South Dakota's agriculture industry is paramount to sustaining economic vitality in our state. We are on a strong path for continuing this legacy well into the future. The South Dakota State University College of Agriculture and Biological Sciences and SDSU Extension are proud of the support role we play in South Dakota's Agriculture Industry.

Since 1882, the results from research conducted throughout the university's network of research laboratories have been applied toward improving the health and productivity of crops, livestock, and the agribusinesses they support. Through SDSU Extension, the major outreach arm of our land grant university, we provide research results to the public in ways that are practical and can be effectively implemented within South Dakota's farms, ranches, and businesses. Agriculture's role in South Dakota's economy today and into the future is sustained through a progressive and educated workforce. South Dakota State University and the College of Agriculture and Biological Sciences well equipped to fulfill this important role.

In a world of Information overload, unbiased, science-based sources like South Dakota Agriculture 2015, are becoming increasingly important in all aspects of agriculture. The data in this annual report provides trend analysis so that, while we can't predict the future, we can at least understand the direction we are heading.

This report takes into account the direct impacts and use of local resources on agricultural production and also captures the indirect economic impacts in areas such as employment and allied industries, as well as the use of agricultural products in processing and manufacturing. The results show a measurable interconnectivity between farm and ranch operations and agribusiness activities, as well as their impacts on supporting South Dakota's broader economy.

The importance of analyzing data to better understand the world around us is no longer just the responsibility of statisticians and policy makers, but also for farmers, ranchers, and agricultural business professionals across our state. On behalf of South Dakota State University, the College of Agriculture and Biological Sciences, and SDSU Extension, I am thrilled that we can play a role in making this information accessible for people throughout South Dakota.

Sincerely,

Saugh Nam Barry H. Dunn, Ph.D.

2014 SOUTH DAKOTA AGRICULTURAL ECONOMIC CONTRIBUTION STUDY

PREPARED BY

Bridging Your Research Needs.

WITH ASSISTANCE FROM

EXECUTIVE SUMMARY

The results of this analysis show that agriculture is a critical component of South Dakota's overall economic well-being. South Dakota agriculture is connected to a large integrated set of industries – from the production of agricultural commodities to food and feed processing to agricultural input manufacturing and many other ag-support industries. The results of the analysis indicate that diminishment or removal of any one of them will likely cause significant negative impacts to the others.

This study is based on a combination of datasets from the 2012 Census of Agriculture, USDA/Risk Management Agency, and the IMPLAN modeling system. The analysis also shows that South Dakota has an agricultural resource base that continues to grow with and support the state's economy at large, primarily due to its integration across all sectors of the economy. Given the vitality of South Dakota's agricultural industries, it is reasonable to assume that South Dakota's agricultural base has room for continued growth and will remain a key part of the state's economic well-being.

KEY FINDINGS

- In 2012, total production agriculture and ag-related industries accounted for \$25.6 billion, or more than 30 percent of South Dakota's total.
- Farming provides the base for a variety of agri-food industries, including food processing and the manufacture of farm machinery, chemicals and fertilizer. Taking those jobs into account means that in 2012, production agriculture and ag-related industries accounted for 115,651, or 1 in every 5 South Dakotans.
- n Crop farming is a significant part of agriculture's economic contribution. Statewide output attributed to crop production and further processing is more than \$13.3 billion and is responsible for 70,104 jobs.
- Livestock farming is also a significant part of agriculture's economic contribution. Statewide output attributed to livestock production and further processing is just under \$8.6 billion and is responsible for 30,303 jobs.
- n 37 of South Dakota's counties derive at least one half of their total output from ag and ag-related industries.
- n 34 of South Dakota's counties derive at least one third of their total jobs from ag and ag-related industries.
- n 26 of South Dakota's counties derive at least one fourth of their total jobs from the crop and crop processing industries.
- n 26 of South Dakota's counties derive at least one fifth of their total output from the livestock and meat processing industries.

STUDY OVERVIEW

This study is patterned after similar analyses done in Iowa in 2005, 2009 and 2014 (forthcoming). This analysis used the same methodology and estimating procedures as these studies in Iowa. The study relies heavily on data from the 2012 Census of Agriculture and the IMPLAN modeling system.

The intent of the study has been to develop an understanding of the current economic importance of South Dakota agriculture and what significance it plays in South Dakota's economy. For that reason, this study is called an economic contribution analysis.

¹Duetothedroughtof2012inSouthDakota,manySouthDakotacountieshadsignificantcropinsuranceindemnities.Toaccountforthis,2012actual crop insurance indemnities by county were added to county crop sales as reported by the 2012 Census of Agriculture.

METHODOLOGY

The 2014 South Dakota Ag Economic Contribution Study was completed with a combination of the 2012 Census of Agriculture, the IMPLAN modeling system (2012 data), SAS (Statistical Analysis System), and Microsoft Excel 2013. Results from this analysis are presented within this Agricultural Statistics book using common economic terms.

Output

The most broad measure of economic activity – sometimes referred to as "sales"

Employment (Jobs)

A measure of job positions without regard to whether they are full-time equivalents

Value-Added

A combination of Labor Income (defined below), Other Property Type Income, and Tax on Production and Imports

Labor Income

The sum of Employee Compensation (work for hire) and Proprietor Income (self-employed) and is a sub-component of value-added.

Due to the large number of sectors available for analysis within the IMPLAN modeling system (440), a degree of aggregation was undertaken to better understand the contribution of agriculture to each of South Dakota's counties relative to other important South Dakota industries. In all, there are 58 sectors identified as being related to agriculture, some of which are not present in South Dakota (i.e., Tobacco Farming and Cotton Farming). In some cases (production agriculture sectors), the 2012 Census of Agriculture was used to calibrate the IMPLAN data for greater accuracy. The rest of South Dakota's industries were aggregated into fourteen other key non-ag industries in South Dakota.

Upon identification of the 58 IMPLAN agricultural sectors, they were further aggregated into three broad agricultural classes: Crops, Livestock, and Other Agriculture. Examples of some sectors included in each of these broad classes are listed below. A summary of Non-Agricultural Sectors is also provided.

Crops

Oilseed Farming, Grain Farming, Vegetable and Melon Farming, Greenhouse, Nursery, and Floriculture Production, Forest Nurseries, Forest Products, and Timber Tracts, Logging, Flour Milling and Malt Manufacturing, Wet Corn Milling, Soybean and Other Oilseed Processing, and Fruit and Vegetable Canning, Pickling, and Drying.

Livestock

Cattle Ranching and Farming, Dairy Cattle and Milk Production, Poultry and Egg Production, Animal Production (Except Cattle and Poultry and Eggs (Hogs)), Fishing, Hunting and Trapping, Fluid Milk and Butter Manufacturing, Cheese Manufacturing, Animal (Except Poultry) Slaughtering, Rendering, and Processing, and Poultry Processing

Other Agriculture

Support Activities for Agriculture and Forestry, Other Animal Food Manufacturing, Fats and Oils Refining and Blending, Breakfast Cereal Manufacturing, Frozen Food Manufacturing, Fertilizer Manufacturing, Pesticide and Other Ag Chemical Manufacturing, Farm Machinery and Equipment Manufacturing, and Veterinary Services

Non-Agricultural Sectors

Construction, Entertainment, Financial, Government, Households, Information, Manufacturing, Mining, Remainder, Retail, Services, Transportation, Utilities, and Wholesale

Please email (spence@decision-innovation.com) or call (515.257.6077) for further information related to methodology.

VISUALS

Figure 1, South Dakota Output by Industry

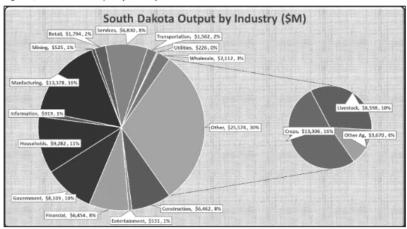

Figure 1 provides an illustration of the level of output derived from each of South Dakota's major industries. As shown, a combination of Crops, Livestock, and Other Ag comprise 30% of all economic activity in South Dakota. Other significant industries include Manufacturing (16%), Government (10%), Financial (8%), Construction (8%), and Services (8%).

Figure 2, South Dakota Jobs by Industry

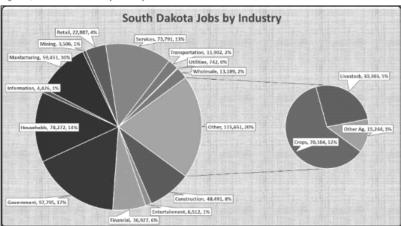

Figure 2 shows the number of jobs originating from South Dakota's major industries. As shown, Crops, Livestock, and Other Ag provide 20% of all jobs in South Dakota. Other significant industries include Government (17%), Services (13%), Manufacturing (10%), and Construction (8%).

Figure 3, Output Derived from Total Ag (\$M)

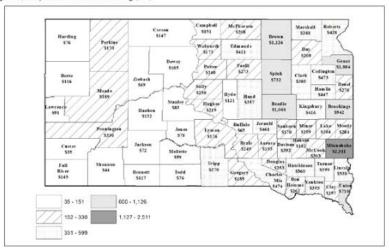

Figure 4, Percent of Output Derived from Total Ag

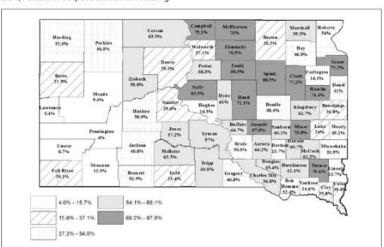

Figure 3 and Figure 4 illustrates the degree to which each South Dakota county derives its output from all of South Dakota agriculture (Crops, Livestock, Other Ag). As shown, as one moves from west to east, counties derive an increasing level of economic activity from agriculture. However, the percent of output derived from agriculture tends to make up a higher share of output the more rural a county is. The share of output derived from all of agriculture ranges from 4.1% to 87.8%.

Figure 5, Jobs Derived from Total Ag

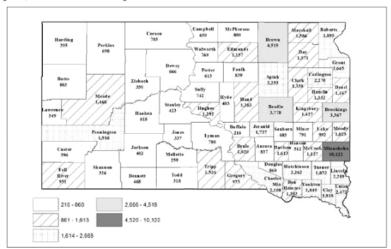

Figure 6, Percent of Jobs Derived from Total Ag

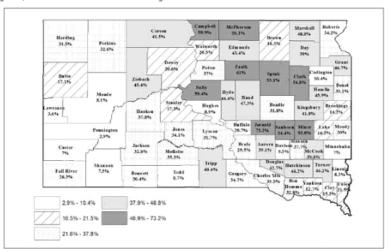

Figure 5 and Figure 6 illustrates the number of jobs by county that find their origins from all of South Dakota agriculture (Crops, Livestock, and Other Ag). As shown, eastern South Dakota counties tend to have a higher number of jobs with origins in South Dakota agriculture. However, the share of jobs derived from agriculture tends to make up a higher share of output the more rural a county is. The share of jobs derived from all of agriculture ranges from 2.9% to 73.2%.

Figure 7, Output Derived from Crops

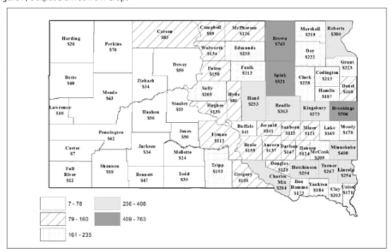

Figure 8, Percent of Output Derived from Crops

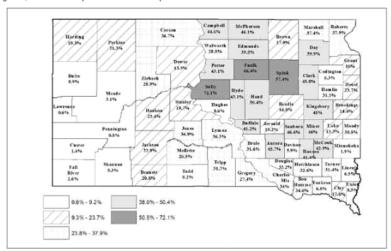

Figure 7 and Figure 8 illustrates the degree to which each South Dakota county derives its output from production and processing of crops. As shown, as one moves from west to east, counties derive an increasing level of economic activity from the production and processing of crops. When the share of output derived from the production and processing of crops is mapped, we see a higher share in counties in the central part of the state. The share of output derived from the production and processing of crops ranges from 0.6% to 72.1%.

Figure 9, Jobs Derived from Crops

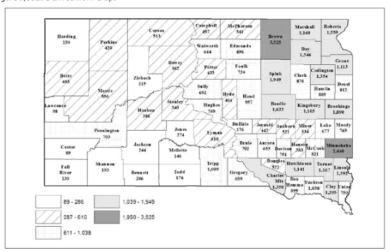

Figure 10, Percent of Jobs Derived from Crops

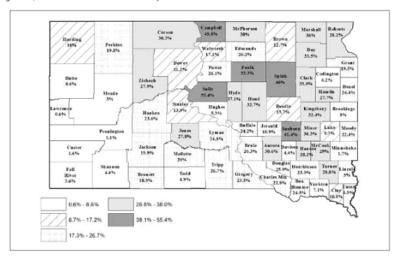

Figure 9 and Figure 10 illustrates the number of jobs that find their origins in the production and processing of crops. As shown, eastern South Dakota counties tend to have a higher number of jobs with origins in the production and processing of South Dakota crops. When the share of jobs derived from the production and processing of crops is mapped, we see a higher share in counties in the central part of the state. The share of output derived from the production and processing of crops ranges from 0.6% to 55.4%.

Figure 11, Output Derived from Livestock

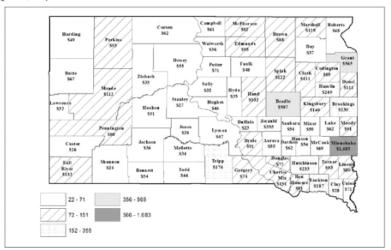

Figure 12, Percent of Output Derived from Livestock

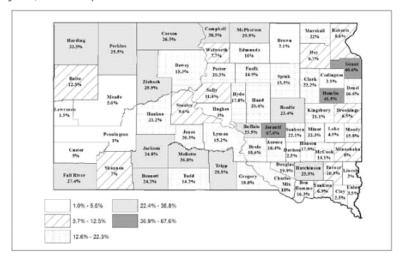

Figure 11 and Figure 12 illustrates the degree to which each South Dakota county derives its output from production and processing of livestock. With the exception of a few eastern counties, there is no clear pattern with regard to the level of economic activity from the production and processing of livestock. When the share of output derived from the production and processing of livestock is mapped, we see fairly even distribution across the state. The share of output derived from the production and processing of livestock ranges from 1.0% to 67.6%.

Figure 13, Jobs Derived from Livestock

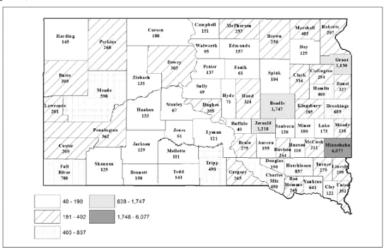

Figure 14, Percent of Jobs Derived from Livestock

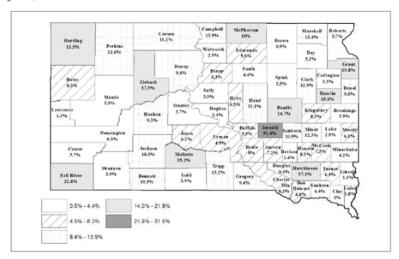

Figure 13 and Figure 14 illustrates the number of jobs that find their origins in the production and processing of livestock. As shown, eastern South Dakota counties tend to have a higher number of jobs with origins in the production and processing of South Dakota livestock. When the share of jobs derived from the production and processing of livestock is mapped, we see no distinct pattern across the state. The share of jobs derived from the production and processing of livestock ranges from 0.6% to 51.6%.

SOUTH DAKOTA COUNTY PROFILES

The following section highlights each county in South Dakota. Crops produced, livestock inventories and agricultural cash receipts are displayed with the appropriate rank among all counties. Data published here is available elsewhere in this bulletin, but is also in this consolidated form for each county. Also included for each county are 2012 agricultural census data

for number of farms, land in farms, harvested cropland, and average size of farm. Below is a table with the data for the entire State with the inclusion of South Dakota's ranking nationwide. On succeeding pages each county is listed alphabetically. If you have any questions on this section, please get in touch with us.
